DOXYCYCLINE IN DELIVRA-DX™

WHAT IS THIS DRUG USED FOR?

Doxycycline in Delivra-DX™ is a unique formulation that contains an antibiotic called doxycycline in a very specialized cream base called Delivra-DX™. The antibiotic, doxycycline, in this instance is being used for its antibacterial properties as well as for its anti-inflammatory properties. Inflammation in your diabetic wound is part of the reason why it is difficult and slow to heal. The goal is to accelerate the healing process by reducing the inflammation in the wound bed.

HOW IS THIS DRUG BEST TAKEN?

The cream needs to be applied in the specific way, on a daily basis. We would like you to apply approximately 1 gram (2 clicks of the bottle) to the wound bed and a little of the surrounding skin, twice per day. Depending on the size of the wound, more may be required. A light coating is sufficient, as you would do with a salve on a regular cut or scrape. Applying too much will not help the wound heal faster, and may actually slow the process. Ideally, you should apply the cream using a sterile glove, but if you do not have one, then please wash your hands thoroughly before applying the cream.

The cream needs to be allowed to penetrate into the wound and skin to be effective. This specialized cream has unique properties that allow it to penetrate through the skin quickly, usually around 5-10 minutes. Once the cream has disappeared from the surface and there is no residual visible, the topping wound dressing can then be applied. It is important that all of the cream disappear from the surface before the overlying wound dressing is put in place in order to prevent

Do not take this drug by mouth. Use on your skin only. Keep out of your mouth, nose, and eyes (may burn).

WHAT DO I NEED TO TELL MY DOCTOR BEFORE I TAKE THIS DRUG?

- If you have an allergy to doxycycline or any other part of this drug.
- If you are allergic to any drugs like this one, any other drugs, foods, or other substances.
- If you are pregnant or plan to become pregnant in the near future.
- If you are breast-feeding or plan to breast-feed.

WHAT ARE SOME THINGS I NEED TO KNOW OR DO WHILE I TAKE THIS DRUG?

All drugs may cause side effects. However, many people have no side effects or only have minor side effects. Although uncommon, mild burning or stinging after using this cream may occur.

DOXYCYCLINE IN DELIVRA-DX™

The cream should be discontinued if you notice any severe skin irritation, redness or increased drainage from the wound bed. This may indicate an allergic response to either the cream or the antibiotic. **If this happens, you should contact your pharmacist or doctor immediately.** If you are allergic to any tetracycline antibiotics, you should NOT use this cream. Please be sure that your doctor has checked this prior to prescribing this cream.

A very serious allergic reaction to this cream is rare. However, get medical help right away if you notice any symptoms of a serious allergic reaction, including: rash, itching/swelling (especially of the face/tongue/throat), blistered or peeling skin with or without fever, wheezing, tightness in the chest or throat, trouble talking or breathing, or severe dizziness.

WHAT DO I DO IN CASE OF AN OVERDOSE?

This cream may be harmful if swallowed. If swallowing or overdose is suspected, contact a poison control center or emergency room right away. Canada residents can call a provincial poison control center. Be ready to tell or show what was taken, how much, and when it happened.

WHAT DO I DO IF I MISS A DOSE?

Take a missed dose as soon as you think about it. If it is close to the time for your next dose, skip the missed dose and go back to your normal time. Do not apply more cream.

HOW DO I STORE THIS DRUG?

Keep all medications away from children and pets.

NOTES

- Do not share this cream. This cream has been prescribed for your current condition only. Do not use it later for another infection unless your doctor directs you to do so.

If you have any concerns or questions, please do not hesitate to contact your NKS pharmacist at 1(866)725-2212
